The BioElectricSurface project has been shortlisted for the “Best Research Project Award” at EuroNanoForum 2013.

Members of the project team will be present at EuroNanoForum 2013 in Dublin at Stand S56 (LANIR / MSSl). The aim of the award is to highlight the innovative outcomes of EU research projects and to present how nanotechnologies enable progress in every aspect of daily life: from health to environment, energy, transport, food and communication. The 11 candidates will be voted on and a winner announced at the ENF2013 on 20 June 2013.

EuroNanoForum is Europe’s largest Nanotechnology and Materials Conference. It takes place every two years and receives funding from the EU’s Seventh Framework Programme for Research and Technological Development. ENF2013 (Dublin, 18-20 June 2013) will focus on the commercialisation of nanotechnologies, exploiting its potential for new applications and taking them further from enabling technologies to end products.

EuroNanoForum [Call for Projects webpage](#) lists the finalists.
